Monday, May 9th

7:00PM – 8:30PM

Meet the Talent

(Sean Duffy & Wendy Rosenquist)

Udar.edu is a game-based classroom response system and educational platform that is used to help elementary school teachers make reading and writing fun for their students.

(Nick Crenshaw, Matt Valenta, Bradley

Carpenter, and Sal Kraja) Through a unique and innovative app, Lit Box aims to find a new way to gamify the group music-playing experience. We have created a way for each person to live out their dreams of being a DJ, and have enhanced the fun of playing music together.

(Gino Piscopo, Luke Radtke, Markos

Christoforou, and Theo Kotsioris) Through a reinvigorating and innovative App, Speed Shop brings an unmatched value to the grocery shopping experience. By revolutionizing the

industry, we provide to on-the-go, occupied, and stressed consumers the solution to time-consumption, inefficiency and frustration in the traditional grocery store setting. Via our app "Speed Shop," we allow consumers to shop from any location and order their groceries through their app account! We want consumers to "Shop on the quick, without getting ticked" by providing a stress-free and fast solution to the dreaded grocery shopping experience.

(Brendan Rathman, Carmen

Galgano, Kevin Zuba, Tom McBride, & Josh Turkson) HOOP-N-Go is a portable basketball hoop that will be able to attach to the trailer hitch of any SUV or truck. People tailgating are often looking for the next cool thing and HOOP-N-GO is that next big thing. HOOP-N-GO adds a new exciting element to the tailgaters experience. But not only is this made for people who are tailgating, but also a family on the go who is looking for a fun activity on the go.

Program

Course Introduction and Welcome

Chad Froeschle

Introduction to Our Partners: Meet the integral part of this program – the business community that served as coaches and mentors
